1. Introduction

This guide was made to help all of you who have no time to experiment with Forms. This is only the first version of my guide, and I will update it as I go along. Now, to direct your attention to?

2. What are Forms?

Forms are like alternate ways to fight. Depending on which one you use, different attributes are powered up and/or weakened. You can only acquire a Form from an area that has not been completed yet, and you must compete certain conditions to acquire them as well. You start out with the Normal Form, which is pretty decent for the beginning of the game. It will do until you get to the actual bosses. Then you will need to spread your abilities out more. And now, the moment you all have been waiting for? the Forms.

3. Normal Form

Stats:

Power: **

Defend: **

Speed: **

Special Abilities: none.

Color: Red

This is the Form that you start out with at the beginning of the game. There is nothing special about this Form, so don't get too excited.

4. Energy Form

Stats:

Power: ***

Defend: **

Speed: *

Special Abilities: Life Capsules appear more often, but still don't expect them too often.

Color: Yellow

This is not too good when it comes to speed, so if you want to get around faster, I suggest a different Form. To get this Form, you must pick up 20 Life Capsules in a single stage.

5. Erase Form

Stats:

Power: **

Defend: ***

Speed: **

Special Abilities: Hit the enemies' bullets and they dissipate! DOES NOT WORK ON BOSSES.

Color: Purple

Like the name suggests, it erases the enemies' shots. It is pretty handy when you don't want to use the Shield Boomerang. To get this Form, you must erase the enemies' shots 20 times in a single stage.

6. Active Form

Stats:

Power: **

Defend: **

Speed: ****

Special Abilities: While in the air, repeatedly press the button your Z-Saber is assigned to, and you will do spinning slashes in the air. Dashing and pressing the Z-Saber button repeatedly will let you do rolling slashes until you stop pressing the button. This has to be my favorite Form.

Color: Orange

The special ability section of it says it all. To get this Form, you must kill enemies with the dashing Z-Saber slash 20 times.

7. Power Form

Stats:

Power: ****

Defend: **

Speed: *

Special Abilities: There is no real special ability to this Form, but it is the strongest of all the Forms.

Color: Dark Blue

This is yet another slow Form, but it wipes the floor with the Bosses if you use it right, which gives you a definite advantage over the regular enemies as well. To get this Form, you must pull any of these 20 times in total for all: enemies, and objects.

8. Rise Form

Stats:

Power: **

Defend: **

Speed: ***

Special Abilities: This is nothing special, but the 3rd slash of your Z-Saber moves up instead of down.

Color: Sky Blue

First, you need to have at least level 3 in Z-Saber skill to get this. Next, to get the Form, you need to kill enemies 20 times with jumping slashes to get this. There really isn't anything special about this Form, but that it's speed is a little better than the Normal Form. This is a good Form to get in the first stage.

9. Credits

Here's a big shout out to everyone, and everything that made this possible:

God

Me

Wigthers 2000(I think)

And you, for taking the time to read this guide.
