Chrono series is © Square Enix. This is an unofficial FAQ, and cannot be used commercially.

Currently, websites other than [www.chronocompendium.com](http://www.chronocompendium.com) and GameFAQs are forbidden from posting this guide. Revisions to this FAQ can only be done with my permission. This FAQ may not be used in a password-protected area, or one that requires monetary payment to access.

The purpose of this FAQ is to serve as a reference file to the events of the series; in the past, players have been hampered in discussion of the game by lack of knowledge of certain events. The Timeline FAQ seeks to correct this. It has been created through several playthroughs of Chrono Trigger, Chrono Cross, and Radical Dreamers, and has been scrutinized by the Chrono Compendium for errors.

## 2.) Helpful Notes

---

The timelines are organized according to this chart:

<http://www.chronocompendium.com/images/wiki/b/b1/Timelines.png>

Reptite Timeline - The world if Lavos had not landed.

Lavos Timeline - The world without the actions of Crono.

Keystone T-1 - The world with the actions of Crono.

Keystone T-2 - The world with Chronopolis introduced in 12000 B.C.

Another World - The natural world 1010-1020 A.D. without Serge.

Home World - The anomalistic world 1010-1020 A.D. with Serge.

Mid-Dimension Timelines - Timelines created while setting up Project Kid.

Ideal Timeline - The world 1010 A.D. and onward of the unified dimensions.

Bend of Time - Chronology of the Bend of Time.

Darkness Beyond Time - Chronology of the Darkness Beyond Time.

Temporal Vortex - Chronology of the Temporal Vortex.

Dimensional Vortex - Chronology of the Dimensional Vortex.

Lost Sanctum - Chronology of the Lost Sanctum.

Note that the End of Time is the same for all timelines, but has nonetheless been divided into sections according to actions in various outside timelines.

Note that the Mid-Dimension Timelines are simply the various timelines that came into being by examples of time travel done to set up Project Kid. The timelines of Home and Another are still relevant, and should be consulted for a chronological order of events.

I will call the seed that appears frequently throughout Trigger a magic seed.

Gaspar, Belthasar, and Melchior are the gurus of Time, Reason, and Life, respectively.

Order of Sidequests (Gaspar's Order):

Fiona's Forest

Ozzie's Fort

Mother Brain

Sun Stone

Cyrus' Ghost

Rainbow Shell  
Black Omen (Queen Zeal)

\*\*\* by a point means that a footnote is provided at the end of the timeline.  
'-' means that an event succeeds everything above it, while a series of  
'\*'s mean that it is unknown which event occurred before the other.  
'-U-' means that this event is dated according to Ultimania, a flawed guide for  
Chrono Cross written in Japan that may nonetheless have some credibility.

-----  
3.)=====REPTITE TIMELINE=====

-----  
=>65000000 B.C.

-History of this dimension is largely unknown; Lavos almost certainly doesn't  
land.

-Reptites conquer the early humans.

=>65000000 B.C. to 2400 A.D.

-Reptites evolve into Dragonians.

-Dragonians build society closely related to nature.

\*Dinopolis is built.

\*The Dragon God is created, a biological machine used to control nature.

=>2400 A.D.

-Dinopolis is pulled to the Keystone T-2 to serve as a counter-balance for  
Chronopolis's introduction to the past.

-With the Dragon God, Dinopolis, and the moon suddenly disappearing, the  
Dragonian society probably underwent perilous times.

-----  
4.)=====LAVOS TIMELINE=====

-----  
=>Pre-65000000 B.C.

-Queen Zeal and Schala are presumably killed, since Lavos does not become a Time Devourer in the original timeline. However, Schala may have also used her power to warp to safety with her mother. \*\*\*If the player loses to Lavos after fighting him through the Black Omen, the 1999 A.D. eruption bad ending plays. Lavos also always has a defeated shell in every appearance after the party removes his shell. An easy explanation for these phenomena is that in the cut scene that plays after Queen Zeal's defeat, she's using the Black Omen as a blue Gate (which flashes as the Black Omen de-materializes) and sending the party to 1999 A.D. to fight Lavos, at which time he'd be at his strongest power.

\*\*\*If the player loses to Lavos after fighting him through the Black Omen, the 1999 A.D. eruption bad ending plays. Lavos also always has a defeated shell in every appearance after the party removes his shell. An easy explanation for these phenomena is that in the cut scene that plays after Queen Zeal's defeat, she's using the Black Omen as a blue Gate (which flashes as the Black Omen de-materializes) and sending the party to 1999 A.D. to fight Lavos, at which time he'd be at his strongest power.

- U-Viper, Radius, Garai and Zappa receive mainland appointments.

- Lucca finds Kid in a forest.

=>Pre-1005 A.D.

- Dalton emerges from the Dimensional Vortex and begins raising an army in Porre.

=>1005 A.D.

- Led by Dalton, the Porre army destroys Guardia.
- \*The Acacia Dragoons may have taken part in the battle, as activity on the 'mainland' is alluded to in this year by Radius.
- Dalton steals the Masamune.
- The Masamune is covered in blood, possibly corrupting it as Masa and Mune are asleep.
- Radius and Garai locate the Masamune in an unknown location.
- Radius kills Garai with the Masamune (it is believed to have occurred in 1005 A.D. since Radius alludes to the last time Zappa, Garai, and Radius tearing up the battlefield as fifteen years ago).
- Radius lays Garai to rest at the Isle of the Damned.

=>1006 A.D.

- \*Van is born.
- Serge is attacked by a panther demon.
- Serge's father, Wazuki, and Leene's father, Miguel, set out for Marbule to seek medical help.

- The storm blows Wazuki and Miguel off-course, and causes the systems of Chronopolis to go offline.
- Wazuki and Miguel lose consciousness and wake to find themselves in the Sea of Eden.
- After landing at Chronopolis, Wazuki is instructed by the Flame to bring Serge to it.
- Contact with the Flame heals Serge and designates him the Arbiter.
- Wazuki is corrupted by the Frozen Flame.
- Harle is created by the Dragons in the appearance of an 18 year old girl while Chronopolis's power is down.
- Chronopolis's systems power back up, and will only grant access to the Flame to the Arbiter, Serge. This can be attributed to the Prometheus circuit.
- Miguel is captured by FATE while Wazuki and Serge escape.

=>1007 A.D.

- U-Lucca finds Kid and adopts her.

=>1000 A.D. to 1010 A.D.

- \*Lucca proposes that time travel is possible with a Time Egg, which utilizes miniature black holes. The first Chrono Trigger was a Time Egg.
- \*Lucca learns of Kid's heritage somehow.
- \*Lucca, at some points, demonstrates the ability to construct incomplete Time Eggs, providing Kid with one.
- \*Lucca also gives Kid an amulet (really a bag with the Zeal emblem containing a piece of wood inside).
- \*Lucca composes a letter to Luccia and leaves it with her.

=>1010 A.D.

- Wazuki attempts to kill Serge, totally losing it in the process and becoming Lynx.
- The dimensions split depending on the outcome (see Home, Another timelines).

-----  
 7.)=====MID-DIMENSION TIMELINES=====

- In the beginning, Chronopolis creates Keystone T-2 by being moved to the past.
- Another World (A) - Timeline(s) created by Belthasar's trip back to the modern era to observe Project Kid and make adjustments with the Neo-Epoch.
- Another World (B) - Timeline created by Kid's possible introduction in 1004 A.D.
- Kid saves Serge after 1020 A.D. in Another World (B), causing the dimensional split and creation of Home World (A).
- Serge travels to Another World from Home World (A) in 1020 A.D., rewriting Kid's history and creating Another World (C).
- Serge travels back to 1015 A.D. to free Kid's mind from the orphanage incident, creating Another World (D).

-----  
 8.)=====HOME TIMELINE=====

=>1010 A.D.

- Serge is saved by Kid, traveling back in time from 1020 A.D. in Another World.

-Due to Serge's survival, the future averted by Crono in which Lavos destroys the world comes back into existence, causing Chronopolis to cease to exist. The Home Dimension's Records of Fate cannot transmit data as a result.

\*FATE instates Miguel as the guardian of the Dead Sea, presumably because the Frozen Flame of that world still lies there.

\*Without FATE to instruct him, Kiki's father becomes a fisherman.

\*Mel is born.

=>1011 A.D.

-U-Fargo and Zelbess attempt to flee from General Viper.

-U-Luccia tries to help, but ends up helping the children only.

-U-Marcy is born.

-U-Zelbess dies.

-U-Fargo entrusts Nikki to a traveler.

-U-Fargo changes his ship to the S.S. Zelbess, an entertainment cruiseliner.

=>1014 A.D.

-Leah is born.\*\*\*

\*\*\*There is common speculation that Leah came to Gaia's Navel by some warp in time. This is not altogether out of the question, considering Gaia's Navel was always present in the sea of El Nido, and not one of the terraformed islands created by Chronopolis; also, two gates existed in 65000000 B.C. in Chrono Trigger, and Kino was found atop Mystic Mountain as a baby. Perhaps Leah went back to that era and then mothered Ayla; however, remember that this would have had to happen before the actions of Crono as well, as they depend on Ayla's existence, meaning if the theory is true, Leah had to return to 65000000 B.C. in the Lavos timeline or not visit Gaia's Navel at all.

=>1015 A.D.

\*NeoFio is planted.

-U-Leena and Serge make a promise on Cape Howl.

=>1016 A.D.

-Dario inherits the Einlanzer.

-Radius becomes chief of Arni.

-U-Lynx approaches General Viper about the Frozen Flame.

=>1010 A.D. to 1017 A.D.

-Lynx approaches Porre about the Frozen Flame in El Nido, prompting the dispatch of Norris to Viper Manor as a spy.

-Norris is recalled back to Porre.

=>1017 A.D.

\*Luccia loses her brother in a freak accident in a Porre lab, prompting her to come to El Nido. Note that this accident could be an explosion set by Norris to destroy Grobyc's level seven tech, the StrongArm. However, this may have taken place in either dimension as well, which would explain how an intact arm resides at Chronopolis.

\*Porre assumes control of El Nido.

\*Dario and Riddel probably plan to marry, as occurs in Another Timeline.

-The Acacia Dragoons set out to explore the Isle of the Damned.

-Dario is severely wounded due to his corruption by the Masamune.

-Dario drifts to Forbidden Island, barely clinging to life.

-Most Acacia Dragoons travel to the Dead Sea and become frozen in time and partially phased out of existence standing before the vortex that leads to Miguel. This is probably done by Lynx to ensure that the Dragoons, now no longer controlled by the Records of Fate, don't cause problems in history.\*\*\*  
-Solt and Pepper somehow survive the incident with amnesia and are taken in by Sneff to the S.S. Zelbess, using the names "Lank" and "Stout".

\*\*\* There is some confusion regarding this event due to the game's script. Specifically, dialogue in Another World establishes Dario's corruption as having occurred in 1017 A.D. This is supported by dialogue in Home World. However, there are two instances in Home World where both the freezing of the Acacia Dragoons and Dario's corruption are alluded to as having occurred in 1016 A.D. Since these are isolated references, and considering that all other evidence supports the date of 1017 A.D., these "four year" allusions are probably oversights by the script writers and should be ignored. Also, while the corruption event is never explicitly depicted in Home World, it is safe to conclude that it did as Dario still has ties to the Masamune in that world and must be battled while wielding it.

=>1017 A.D. to 1020 A.D.

\*FATE presumably plants the Masamune in Death's Door to prevent entrance to the Dead Sea.

\*Starky's UFO crashes in El Nido Triangle, and is destroyed.

\*Toma XIV becomes financially unstable and must garden for Radius in Arni.

\*Norris returns to investigate Viper Manor, finding evidence that the Dragoons sailed to the Dead Sea.

=>1020 A.D.

-Serge has a troubling dream of Fort Dragonia.

-After waking up, Serge is instructed by Leena to find three Komodo scales and meet her at Opassa Beach.

-Serge's party returns to Another World.

-Radius leaves Arni.

-Serge, now with the body of Lynx, returns from the Temporal Distortion in the Hydra Marsh with Sprigg and Harle.

-A decision is made that Serge must enter the Dead Sea, but only the Sage of Marbule supposedly knows how to gain access.

-Serge ventures to Marbule, only to find the village deserted and Irenes crying at night.

-Irenes provokes Serge to go to the S.S. Zelbess.

-Serge locates the Sage of Marbule in the Grand Slam room.

- Dario begins rebuilding Viper Manor as a childrens' center.
- Serge uses the Dragon Tear at Fort Dragonia to regain his old body.
- Serge's party ventures to the Dead Sea and uses a FATE distortion to cross the dimensions.
- Serge's party returns and consults with ghosts of Crono's party at Opassa Beach.
- Serge's party uses the Time Egg to enter the Darkness Beyond Time, also known as the Tesseract.
- Serge's party aligns the element song and uses the Chrono Cross.
- The Time Devourer is annihilated and Schala is freed.
- The dimensions merge back into a single dimension.

=>15410 A.D.

- Miguel is interred at Nadia's Bell as a guardian of Home World's Frozen Flame.

=>15420 A.D.

- The Dead Sea, specifically Nadia's Bell, is viewed and exists in this year relative to Serge's party in 1020 A.D.
- Miguel battles Serge for access to the Frozen Flame, and loses.
- FATE dissolves the Gate effect allowing the Dead Sea to exist, and destroys the Frozen Flame.\*\*\*

=>1014 A.D.

-Leah is born.\*\*\*

\*\*\*There is common speculation that Leah came to Gaia's Navel by some warp in time. This is not altogether out of the question, considering Gaia's Navel was always present in the sea of El Nido, and not one of the terraformed islands created by Chronopolis; also, two gates existed in 65000000 B.C. in Chrono Trigger, and Kino was found atop Mystic Mountain as a baby. Perhaps Leah went back to that era and then mothered Ayla; however, remember that this would have had to happen before the actions of Crono as well, as they depend on Ayla's existence, meaning if the theory is true, Leah had to return to 65000000 B.C. in the Lavos timeline or not visit Gaia's Navel at all.

=>1015 A.D.

-NeoFio is planted.

\*It is believed that during 1015 A.D., Lynx attacks Lucca's orphanage and abducts Lucca in a vain attempt to release the lock on the Frozen Flame.

-Kid becomes trapped in her memory of this experience in 1020 A.D.

-Serge's party comes here thanks to the power of Masa, Mune, Doreen, and Kid's Astral Amulet.

-Serge's party saves children and assists Kid's escape.\*\*\*

-Kid escapes, vowing to seek vengeance for Lucca.

\*\*\*Note that Kid escaped originally, even before Serge intervened to bring Kid out of this memory. Otherwise, this would be a causal loop - that is, Kid's meeting Serge depends on his saving her, which depends on his meeting her, and so on.

=>1016 A.D.

-Dario inherits the Einlanzer.

-Radius presumably retires from the Dragoons.

-Radius comes to live in Hermit's Hideaway.

-U-Lynx first approaches General Viper about the Frozen Flame.

However, this may have taken place in either dimension as well, which would explain how an intact arm resides at Chronopolis.

-Dario and Riddel pledge to marry.

-The Acacia Dragoons set out to explore the Isle of the Damned.

- Serge's party is instructed by Belthasar to battle the Time Devourer.
- Serge's party heads to Opassa Beach in Home World.

\*\*\* There is an overarching plot line that did not totally make it into Chrono Cross. It suggested that if Serge did not stop the Time Devourer, he would inevitably merge with it too, and that this would complete the being and result in the death of spacetime. Lynx's calling him the "Assassin of Time" is very suited for describing this outcome. For more on this plot line, read:

-----  
A.)=====IDEAL TIMELINE=====

=>1020 A.D.

- The dimensions merge, perhaps creating an ideal dimension. Serge lives.
- Serge supposedly forgets all memories of the adventure.

=>1020 A.D. to 2300 A.D.

- Serge possibly marries Kid, as evidenced by a wedding photograph.
- \*Schala's fate is totally unknown, along with the fates of Serge's party and the state of the world after Chrono Cross.\*\*\*

\*The Sun Palace most likely rises from the bottom of the sea.

\*\*\* Chrono Cross's ending is so open-ended that hardly anything can be inferred, leaving this timeline mostly blank. For speculation based on the few known facts of the ending, see this article:
